

KRUSHI CHANG HARVESTERS

THE LEADER IN SUGARCANE HARVESTER, SUGARCANE LEAF CUTTER & SUGARCANE LOADER

WHY KRUSHI CHANG HARVESTERS

- Affordable
- Easy to use
- High speed performance
- Stacks the sugarcane shoots neatly and also increases productivity
- Can be attached to all types of tractors
- International Patent Design
- Built with durable and high quality material to give the best output
- Manufacturing expertise of over 6 decades

SUGARCANE HARVESTER: F SERIES- F16M AND F16L

All of our **Krushi-Chang** Harvesters are uniquely designed and developed to give maximum output to the farmers and our customers. Our F series Sugarcane harvesters are productive and easy to use. Each Stack provides 300-500 kg of sugarcane shoots with a capability to cut 210-230 tons of sugarcane per day.

- Compact and easy to manoeuvre through narrow spaces
- F series is driven by one of its kind Axle shaft which also has a patent on our name
- Comes with a valve control unit for the engine
- F series have Drive couplings which connects to the drive, rotating points and shaft Instead of the steel casings
- Use of 2 transmission gears which increases the RPM of the blades for efficient cutting
- Easy to maintain
- Robust After sales team and 100% Availability of Spares
- We also manufacture a full line of quick attach grapples for the tractors

F16M

SUGARCANE HARVESTER MODEL- F16 M

Mounted with the Tractor:	70 HP engine or over out
Cutting System:	Axle shaft
Production Per Day:	210-230 Tons
Conveyor System:	Hydraulic System / Rubber Pad
Stacking Capacity:	Cut and stack neatly without going backward
Weight:	965 Kilogram
Approximate fuel consumption:	10.12 Litres per acre

F16L

SUGARCANE HARVESTER MODEL- F16 L

Mounted with the Tractor:	45-60 HP engine or over out
Cutting System:	Axle shaft
Production Per Day:	40-100 Tons
Conveyor System:	Hydraulic System / Rubber Pad
Stacking Capacity:	Cut and stack neatly without going backward
Weight:	760 Kilogram
Approximate fuel consumption:	5.06 Litres per acre

SUGARCANE HARVESTER – T900 & S500

Krushi Chang Sugarcane Harvester is one of our best sold Harvesters in the market . It allows you to choose how you stack the cane which further saves time . 1 Stack provides 300-500 kg sugarcane shoots with a capacity to cut 40-230 tons of sugarcane shoots per day.

T900

SUGARCANE HARVESTER MODEL – T900

Mounted with the Tractor:	70 HP engine or over out
Cutting System:	Axle shaft
Production Per Day:	210-230 Tons
Conveyor System:	Hydraulic System / Rubber Pad
Stacking Capacity:	Backward Stacking
Weight:	1,100 Kilogram
Approximate fuel consumption:	10.12 Litres per acre

S500

SUGARCANE HARVESTER MODEL – S500

Mounted with the Tractor:	45-60 HP engine or over out
Cutting System:	Automatic Chain Adjuster (Tensioner)
Production Per Day:	40-60 Tons
Conveyor System:	Hydraulic System / Rubber Pad
Stacking Capacity:	Backward Stacking
Weight:	560 Kilogram
Approximate fuel consumption:	5.06 Litres per acre

SUGARCANE LOADER

With it's new technology and hydraulic front wheel drive system **Krushi-Chang** Sugarcane loader is recognised and widely used by farmers globally . With its high speed performance, heavy built yet light weight structure, it delivers what it is built for . With features like hydraulic pump and high velocity heating/cooling system. The reach of the loader is up to 5.5 metres high with a loading capacity of 400-500 kg (per loading).

SL500

SUGARCANE LOADER

Engine:	HINO
HP:	120 HP
Weight:	4 Tons
Loading Capacity:	300-500 Kilograms
Boom Reach:	5.50 Metres High
Wheel:	4 Wheels
Width*Lenght*Height	2.2 x 4 x 2.5 Metres
Drive / Transmission System	Gear and Hydraulic System

SUGARCANE LEAF CUTTER: C4 AND C5

Krushi-Chang Sugarcane Leaf Cutters are designed to remove the leaves from the sugarcane shoots in a very effective and efficient manner which helps in increasing the total tonnage and quality of the cane delivered from your field and also avoids traditional method of burning the shoots. 1 set of our durable high quality nylon cutting line can cut 12 acre of sugarcane plantation.

C4

SUGARCANE LEAF CUTTER MODEL- C4

Mounted with the Tractor:	14-30 HP engine or over out
Power:	P.T.O. 540 RPM
Ridge high:	2.5 Meters
Stripping tool:	Durable high quality Nylon Cutting Line
Production per 1 set of Stripping Tool:	6 to 12 acres
Weight:	193 Kilograms

C5

SUGARCANE LEAF CUTTER MODEL- C5

Mounted with the Tractor:	24-30 HP engine or over out
Power:	P.T.O. 540 RPM
Ridge high:	3.5 Meters
Stripping tool:	Durable high quality Nylon Cutting Line
Production per 1 set of Stripping Tool:	6 to 12 acres
Weight:	247 Kilograms

Choose a smarter future,
choose **Krushi Chang Harvesters**,
the revolution in Agricultural Harvesting
is here!
